

Legal electronic signing of your documents

More and more documents are exchanged electronically, but often a signature remains required or **trust** needs to be increased by signing the document. The Certipost e-Signing service allows you to sign electronically any type of file or document with a Certipost digital certificate or eID. This results not only in **cost savings**, but also in **speed of delivery**. Moreover **storage** of the document electronically is easy and **environment** friendly. The receiver can verify if the electronic signature is valid and the Belgian and European legislation. It also provides the receiver the **comfort** that **nothing in the document was changed** during the electronic transfer, for instance by e-mail.

Certipost legal e-Signing creation service

- With each **digital qualified certificate** on smartcard or USB token, bought at Certipost, the customer gets currently 100 free credits to sign documents via the e-Signing service via www.certipost.be/e-signing
- **Additional signing packs** can be bought in our webshop: www.certipost.be/webshop
- In 3 simple steps you can sign most common documents with **legal value equivalent to handwritten signature** and send them easily to your receiver.

- The **receiver can countersign** via the Certipost e-Signing service. Single use credits can be bought for distribution.
- Our e-Signing service can also be **integrated in your organization's web-applications**.

Certipost e-Signing verification service

- the receiver of your document can easily check **free of charge** the electronic signature using the e-Signing verification service via www.certipost.be/e-signing in 3 clicks
- The verification also **guarantees** that **nothing** was **changed** in the content of the document, PDF, PowerPoint, excel sheet or whatever file after the signature.

- No need to verify different locations for the presence of a signature: the **one** verification ensures the whole document.
- The receiver also benefits of easy electronic **storage**. No more need to scan documents anymore.

Advantages of Certipost e-Signing

Confidence means business

By signing your documents with a signature of handwritten equivalent legal you increase trust at your partners or customers. The content of the document or file cannot be changed anymore after your signature. The speed of delivery improves the way **you** are doing business

Cost savings

Working electronically does result in cost savings. No more printing and/or scanning of your documents. Long term storage can also be provided by Certipost.

Experience in security

Certipost has been a recognised digital certificate supplier since 1998 and is controlled by the Belgian Federal Public Service Economy as a Qualified Certification Authority.

Increased efficiency and faster work

Time is money, so increase your efficiency via electronic signatures (no more printing and sending the documents by fax or letter and storage becomes very simple) Starting with e-Signing is a first step in integrated e-business solutions

Less waste of paper

Paper bureaucracy, often only still required for legal reasons, can finally be totally eliminated. In this way you will contribute towards an environment-conscious business management.

Professional image

By digitally signing and securing your documents or files you will provide your company with a professional image.
